Hunter® The Irrigation Innovators

High Efficiency Nozzle Performance

Check Valve Eliminates Low Head Drainage

Available with factory-installed check valve to control low head drainage.

Check Valves for Runoff Prevention

Hunter® The Irrigation Innovators

Pressure Regulation Makes More Efficient Use of Water

Non-Pressure Regulated

Pressure Regulated

Passively Reduces water loss

Regulator acts as a flow control device if nozzle is removed – controlling the flow loss and eliminating potential damage to surrounding structures.

No Regulator

With Regulator

Pressure Regulated Valves
